

Jet-Vac

new

**labor-saving
Jet-Vac**

The **NEW** Jet-Vac takes the work out of the task of removing water and other debris from weather-exposed casings. Simply insert the nozzle into the casing, press valve and water is rapidly expelled through the outlet of the Jet-Vac. A 30" outlet extension hose is included and can be used to deposit water into a pail or other container when the Jet-Vac is operated indoors. Air requirements: 1/4" air line with 100 p.s.i.
